WHO WE ARE

Campos Fabrication is the leader in energy infrastructure manufacturing - piloting the way in high end fabrication with our team of professional craftspeople.

Campos Fabrication is located in a state of the art 15,000 sq ft facility in Amherst, NH. It is here that we are proud to offer full turn-key projects that focus on custom engineered fabrication solutions.

Our new location houses a dedicated team of project managers, engineers, and some of the most talented welders in the region. Production and distribution of high-end custom fabrication will be a team effort and will deliver many benefits to our new and existing clients.

We are expanding fulfillment capabilities, thereby ensuring an overall positive customer experience on a national scale.

OUR PROCESS

Once Campos Fabrication begins working on a project, our team immediately starts working together to plan out how to complete the project in the most efficient and cost-effective manner for the client. We take the time to compare prices to ensure we are purchasing the highest of quality products at the most competitive rates.

With the project designs worked up by our talented engineers, our expert welders can begin meticulously fabricating the design. Upon completion of the build, we start our in-house quality inspection to certify that the fabrication is per design and ready to be utilized for its intended purpose. Lastly, after the completion of the inspection, the coating process begins inside our paint booth ensuring the highest quality finish within a controlled environment.

OUR SERVICES

★ FULLY AUTOMATED CUTTING & BEVELLING

We use a state-of-the-art plasma cutting machine from Lone Star that can both cut and bevel pipe, as well as structural elements.

★ DESIGN BUILD

Our engineers can take your idea from concept to design, utilizing 3D modeling.

★ START-UP & TESTING

Pressure and functional testing.

★ TRAINING

Campos Fabrication is dedicated to continuously mentoring employees to increase their knowledge and skillset utilizing industry expert training courses and implementing advanced technology.

★ TURNKEY

Campos Fabrication has the in-house capability to take your project from design and permitting to installation and start-up.

★ CONTROL PANEL

Construction, wiring and programming.

★ PAINT & SPECIALTY COATINGS

We utilize a two-part epoxy to prime the pipe for rust prevention with a final coat of DTM (direct to metal) paint.

★ WELDING

Including Tig, Mig and Stick welding for both pipe and structural steel.
